Non-GAAP Financial Measures

This communication includes certain non-GAAP financial measures that we regularly review to evaluate our business and trends, measure our performance, prepare financial projections, allocate resources, and make strategic decisions. We believe these non-GAAP measures help to illustrate the underlying financial and business trends relating to our results of operations and comparability between current and prior periods. We also use these non-GAAP measures to establish and monitor operational goals. However, these non-GAAP measures are not superior to or a substitute for prominent measurements calculated in accordance with GAAP. Rather, the non-GAAP measures are meant to be a complement to understanding measures prepared in accordance with GAAP.

Gross Profit and Adjusted Gross Profit Margin

The Company's adjusted gross profit metric represents revenues less cost of services (excludes depreciation and amortization). Adjusted gross profit margin is adjusted gross profit divided by revenues. We review these non-GAAP measures to evaluate our underlying profit trends. The reconciliation of adjusted gross profit to its most comparable GAAP measure is provided below:

	Three Months Ended December 31,		Years Ended December 31,

Gross profit margin	37.7 %	35.0 %	37.0 %	35.4 %

EBITDA and Adjusted EBITDA

EBITDA and adjusted EBITDA are performance measures. EBITDA is earnings before interest expense, income tax, and depreciation and amortization expenses ("EBITDA"). Adjusted EBITDA begins with EBITDA but further excludes certain non-cash costs, such as stock-based compensation and the write-off of the carrying value of investments or other assets, as well as debt extinguishment and modification expenses and other expenses and income items considered non-recurring, such as acquisition integration expenses, certain professional fees, and litigation settlements. We review the non-GAAP adjusted EBITDA measure to evaluate our business and trends, measure our performance, prepare financial projections, allocate resources, and make strategic decisions.

The reconciliation of adjusted EBITDA to its most comparable GAAP measure is provided below:

Adjusted Earnings (Loss) Per Share (Adjusted EPS)

Adjusted EPS is a performance measure. Adjusted EPS is calculated by dividing adjusted net income attributable to common shareholders by weighted average number shares outstanding for the respective periods.

Adjusted net income attributable to common shareholders begins with net income attributable to common shareholders adjusted to exclude various items listed below. We believe that Adjusted EPS is a measure that is useful to investors and management in understanding our ongoing profitability and in analysis of ongoing profitability trends.

Priority does not provide a reconciliation of forward-looking non-GAAP financial measures to their comparable GAAP financial measures because it could not do so without unreasonable effort due to the unavailability of the information needed to calculate reconciling items and due to the variability, complexity and limited visibility of the adjusting items that would be excluded from the non-GAAP financial measures in future periods. When planning, forecasting and analyzing future periods, the Company does so primarily on a non-GAAP basis without preparing a GAAP analysis as that would require estimates for various cash and non-cash reconciling items that would be difficult to predict with reasonable accuracy. For example, stock-based compensation expense would be difficult to estimate because it depends on the Company's future hiring and retention needs, as well as the future fair market value of the Company's common stock, all of which are difficult to predict and subject to constant change. As a result, the Company does not believe that a GAAP reconciliation would provide meaningful supplemental information about the Company's outlook.

Important Notice Regarding Forward-Looking Statements and Non-GAAP Measures

This presentation contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements include, but are not limited to, statements about future financial and operating results, our plans, objectives, expectations and intentions with respect to future operations, products and services, and other statements identified by words such as "may," "will," "should," "anticipates," "believes," "expects," "plans," "future," "intends," "could," "estimate," "predict," "projects," "targeting," "potential" or "contingent," "guidance," "anticipates," "outlook" or words of similar meaning. These forward-looking statements include, but are not limited to, Priority Technology Holdings, Inc.'s ("Priority", "we", "our" or "us") 2026 outlook and statements regarding our market and growth opportunities. Such forward-looking statements are based upon the current beliefs and expectations of our management and are inherently subject to significant business, economic and competitive risks, trends and uncertainties that could cause actual results to differ materially from those projected, expressed, or implied by such forward-looking statements. Our actual results could differ materially, and potentially adversely, from those discussed or implied herein. We caution that it is very difficult to predict the impact of known factors, and it is impossible for us to anticipate all factors that could affect our actual results. All forward-looking statements are expressly qualified in their entirety by these cautionary statements. You should evaluate all forward-looking statements made in this presentation in the context of the risks and uncertainties disclosed in our Securities and Exchange Commission ("SEC") filings, including our Annual Report on Form 10-K filed with the SEC on March 10, 2026. These filings are available online at www.sec.gov or www.prioritycommerce.com.

We caution you that the important factors referenced above may not contain all of the factors that are important to you. In addition, we cannot assure you that we will realize the results or developments we expect or anticipate or, even if substantially realized, that they will result in the consequences we anticipate or affect us or our operations in the way we expect. You are cautioned not to place undue reliance on forward-looking statements as a predictor of future performance. The forward-looking statements included in this presentation are made only as of the date hereof. We undertake no obligation to publicly update or revise any forward-looking statement as a result of new information, future events or otherwise, except as otherwise required by law. If we do update one or more forward-looking statements, no inference should be made that we will make additional updates with respect to those or other forward-looking statements. We qualify all of our forward-looking statements by these cautionary statements.

This presentation includes certain non-GAAP financial measures that are not prepared in accordance with accounting principles generally accepted in the United States ("GAAP") and that may be different from non-GAAP financial measures used by other companies. Priority believes that the use of these non-GAAP financial measures provides an additional tool for investors to use in evaluating ongoing operating results and trends of the Company. These non-GAAP measures should not be considered in isolation from, or as an alternative to, financial measures determined in accordance with GAAP. See the footnotes on the slides where these measures are discussed and the slides at the end of this presentation for a reconciliation of such non-GAAP financial measures to the most comparable GAAP numbers. Additionally, we present guidance for Adjusted EBITDA and Adjusted EBITDA as percentage of revenue, non-GAAP measures without reconciliation due to the inherent difficulty in forecasting and quantifying certain amounts that are necessary for such reconciliations. See more information in Priority's earnings press release. Adjusted Gross profit referred throughout this presentation is a non-GAAP measure calculated by subtracting Cost of services (excluding depreciation and amortization) from Revenue. Adjusted Gross profit margin referred throughout this presentation is a non-GAAP measure calculated by dividing Adjusted Gross Profit discussed above by Revenue. Adjusted EBITDA referred to throughout this presentation is a non-GAAP measure calculated as net income prior to interest expense, tax expense, depreciation and amortization expense, adjusted to add back certain non-cash charges and / or non-recurring charges deemed to not be part of normal operating expenses. Adjusted EBITDA margin referred throughout this presentation is a non-GAAP measure calculated by dividing Adjusted EBITDA discussed above by Revenue. See Appendix 1 – 2 of this presentation for a reconciliation of Adjusted Gross Profit to Gross Profit as per GAAP, a reconciliation of Adj. EBITDA to GAAP Income (loss) before Taxes and Priority's earnings press release for more details.
